

OUR VISION

Traditional finance doesn't work. For too long it's been serving the wealthy suits while erecting barriers of entry for everyone else. They own the data, restrict the tools, and change the rules to always be in their favor. It's time to not only give that power back to the people, but to create

even more powerful tools that the old cumbersome system could never dream of.

At LAIKA INU FINANCE, we're building a community composed of brilliant minds all seeking control of their own finances and building a new system that works for everyone. Synthetic assets allow us to create financial instruments and markets never seen before. If the data exists, so too can a marketplace for it - the possibilities are endless.

It all comes down to data. Most people aren't aware that financial data is what makes institutions so powerful and why you can't do what they do. This is why synthetics will matter. If you can get liquidity in any discrete quantifiable event, what have you created? The world's most accurate financial data system. Financial data is used within insurance, lending, hedge funds, risk mitigation, banking, yield, mortgages, credit scores, etc.

Incentivised synthetics allow you to start building an open financial data market. Once you have synthetics, you own the financial data stream to anything because you can incentivise liquidity to make it more accurate. With this financial data stream you can start any DeFi business you want on top of it, or package and sell the data for others to build on. You become the foundation for the future of finance.

OUR ECOSYSTEM

LAIKA INU FINANCE aims to build an efficient, circular ecosystem that brings together the best resources—from mainstream financial products to breakthrough technology applications—to maximize value.

Laika Wallet – a personal wallet which has the abilities to store all currencies, \$LAKA tokens and other cryptocurrencies as well.

+ The wallet also has the ability to bridge different cross-chain networks with the lowest transaction fee.

+ The wallet also has the ability to manage/track cryptocurrency/fiat expenses.

Laika Launchpad – an incubator for potential projects with real user cases. All these projects are checked and moderated by the Laika Inu Finance Team comprised of developers and individuals with more than 10 years of experience in the world of cryptocurrency, payment gateways and startups. There is a guarantee that no scam projects will be released on the Laika Launchpad.

LaikaNFT Marketplace – a high-valued digital asset exchange which has daily auctions (NFT products) integrated with LaikaWallet where you can own any digital asset with just a click of a mouse. LaikaWallet will be built with the ability to hold the collectibles.

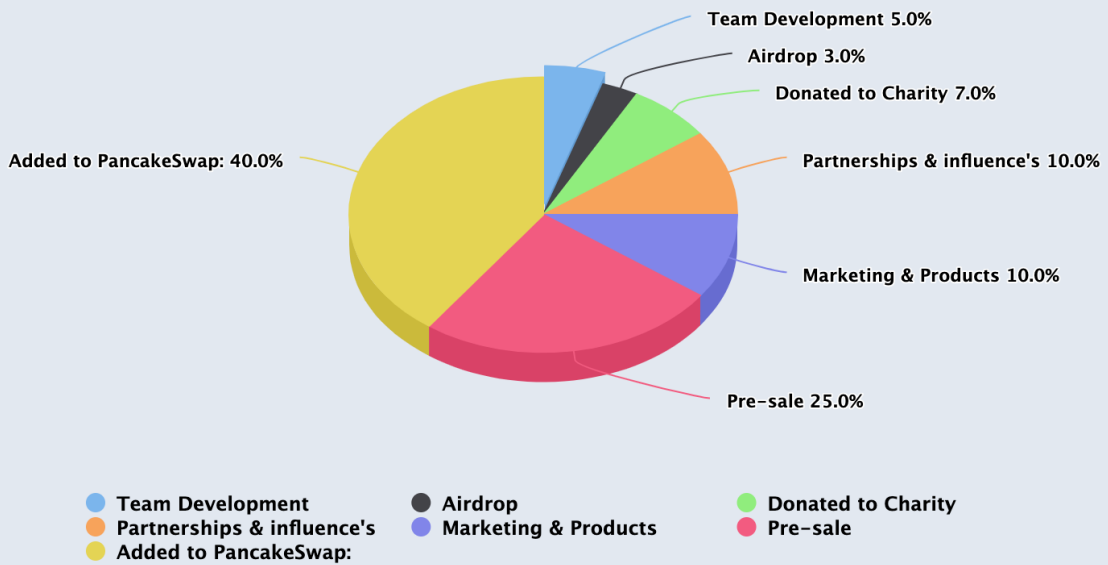

Laika Auto Staking – When an investor stakes a Token and staking the pool, it is the easiest method to do, in a decentralized world.

There is very sufficient energy consumption and stumpy probabilities of risks while staking than any crypto mining. Laika Auto Staking is here for you.

Laika Lottery – It's easy, fair, and you can enter as often as you like as long as you have the **\$LAKA** to buy a ticket.

The Laika Lottery is a game of chance in which winners are selected randomly. Our lottery allows every user who bought at least one lottery ticket to get rewarded with huge **\$LAKA** prizes.

TOKEN DISTRIBUTION

HOW TO BUY ?

Buying \$LAKA is easy

🔥 Download the Metamask or Trust Wallet and create a wallet. Then proceed to fund your wallet with BNB. Make sure you have enough for gas fees.

🔥 Open your Metamask Wallet or Trust Wallet

🔥 Go to DApps

🔥 Copy this link <https://laikainu.io/>

🔥 Paste into your Apps search bar

🔥 Select Binance Smart Chain Network

🔥 Enter the amount of BNB you want to pay

🔥 Click Buy and Connect your wallet
